## SKILLS

- **Programming Languages** : Java, SQL
- **Libraries and Frameworks** : Spring Boot
- **Tools** : Redis, spring security, MySQL, Postman
- **Other Skills** : Backend Development, Data structures and Algorithms, RESTful APIs

## PROJECTS

### Productservice

- Architected a Microservices based ECommerce Platform with support of core functionalities of any ECommerce Website like Product Catalog, Payment Gateway Integration
- Implemented Event Driven Email Service to allow sending emails at large scale across different services within the Platform.
- Implemented powerful sorting, filtering using Elasticsearch to allow for efficient discovery of products.
- Optimized the response time of APIs from ~500 ms to ~50 ms by making effective usage of Caching for static data using Redis Cache.
- Tools and Frameworks Used: Spring Boot, MySQL, Redis, Razorpay Payment Gateway

### Online Job Portal

- Architected and developed backend services for a job portal web application using Spring Boot 3.
- Implemented user registration and authentication systems with Spring Security, ensuring robust and secure access control.
- Built backend logic for job posting, candidate applications, and recruiter dashboards, connecting with a MySQL database using Spring Data JPA and Hibernate.
- Created RESTful APIs to handle user interactions such as job searches, applications, and recruiter profile updates.
- Tools and Frameworks Used: Spring Boot, MySQL, Spring Security

## ACHIEVEMENTS

- Solved 350+ problems on leetcode
- Solved 160+ problems on Scaler academy's platform
- Ranked 11,494 out of 25,000+ participants in a LeetCode weekly programming contest held on 16/6/24 .

## EDUCATION

**Madhav Institute of Technology and Science, Gwalior**

2025

BE/B.Tech/BS

**Scaler**

2025

Specialized in Software Development & Problem Solving
